

GRAPHIC DESIGN

Bachelor of Fine Arts

School of Media and Design

Program Overview

The Graphic Design program at the University of the Incarnate Word is designed to provide students with the design and technical training in preparation of a career in the field of graphic design, interactive design, or various other fields related to design and visual communication. The department uses state-of-the-art facilities to make sure that the appropriate hardware and software training is taking place. However, the true focus is upon design and design principles--the skills that truly allow students to gain and keep employment as the industry continues to evolve and change.

The Portfolio Review

The goal of the Graphic Design program is to prepare students for a demanding and competitive profession. Dedication to this goal means that the program must be selective in quantity in order to offer students the best quality experience.

A student's success in the concentration depends on a solid foundation in visual design, communication concepts, problem solving ability, and software skills. Since the experiences and backgrounds of entering students vary widely, some students need additional time at the foundation level before they are ready for their concentration courses. Because the Graphic Design program requires a specific set of skills, all students must submit a portfolio for review. Passing this review is required for admittance to the Graphic Design major and before concentration classes may be attempted.

More information can be found at the following link: <http://uiw.gd/review>

Career Opportunities

After completing a degree in Graphic Design, a career can follow many different paths. The field is wide enough to include opportunities in Print Design (i.e. corporate branding, art director, creative director, information designer, advertising production, and packaging), and Interactive Design (i.e. front-end developer, user interface designer, webmaster, motion designer, and usability designer). Employment opportunities within the field of Graphic Design can be found in San Antonio, throughout Texas, and all across the country.

Students that have passed the Portfolio Review and are accepted into the Graphic Design program will be required to purchase (or show proof of ownership of) a qualified laptop and the required software. This program allows our students to take responsibility of their own work habits and conditions, allowing them the flexibility to work in class, on campus, and at home.

Current specifications can be found at the following link: <http://uiw.gd/laptop>
