Sexual Harassment

- Sexual harassment means unwelcome, sex-based verbal or physical contact that:
 - In the employment context, unreasonably interferes with an employee's work performance or creates an intimidating, hostile, or offensive work environment; or
 - In the education context, is sufficiently severe, persistent, or pervasive that the conduct interferes with a student's ability to participate in or benefit from educational programs or activities.

What can I do if I feel sexually harassed?

- If you are comfortable, you can talk with the person, inform them you are uncomfortable with the behavior and ask them to stop.
- Report an incident at www.uiw.edu/titleix

Sexual Assault

- Sexual assault means sexual contact or intercourse with a person without the person's consent, including sexual contact or intercourse against the person's will or in a circumstance in which the person is incapable of consenting to the contact or intercourse.
- *Sexual contact* means any touching of the anus, breast, or any part of the genitals of another person with intent to arouse or gratify the sexual desire of any person. If this contact occurs with the absence of consent, it is a violation of UIW's Sexual Misconduct Policy. Force is not limited to physical violence but also includes threats, intimidation, abuse of power, coercion and/or duress.
- *Sexual intercourse or penetration* includes, but is not limited to: penetration (oral, anal or vaginal) with any object or body part.

Sexual Assault

- The following hospital offers the services of a Sexual Assault Nurse Examiner (SANE) who has specialized training in medical examinations as well as the legal, forensic & psychological needs of a complainant of sexual misconduct:

- It may be difficult to know in the immediate aftermath of a sexual assault whether or not an individual will want to pursue legal charges. Having evidence collected does not commit an individual to reporting or prosecuting the assault. Evidence can usually be collected up to five (5) days after an assault, though likelihood of capturing evidence decreases with time. Showering, urinating and brushing teeth may destroy evidence. Clothing and bedding may contain evidence and can be taken to Methodist Specialty and Transplant Hospital in a paper bag (not plastic). Drugs used in a sexual assault often leave the body very quickly.
