

## Interior Design Summer Continuing Education Classes at UIW

### Classes June 24–28, 2024 Joyce Building

	Monday June 24	Tuesday June 25	Wednesday June 26	Thursday June 27	Friday June 28
<b>9AM – 12PM</b>	SketchUp Part 1 Judy Ruvuna	Advanced SketchUp (Part 3) Judy Ruvuna	Space Planning Diana Allison	Hand Sketching Interiors Diana Allison	Wellness and Sustainability Adam Nash, LEED GA & WELL Certified
<b>1 – 4PM</b>	SketchUp Part 2 Judy Ruvuna	Enscape Judy Ruvuna	Lighting and Electrical Diana Allison	Intro to Building Codes & Standards Adam Nash, LEED GA & WELL Certified	Digital and Physical Board Construction Liza Casillas

**3 hour classes: \$90 per class**

#### **SketchUp Part 1**

This course is an introduction to SketchUp tools used to create 3-D models from Floor plans and generate 3 D Views. Suggestions for course assignments will be given.

#### **SketchUp Part 2**

This course builds upon Part 1 using more advanced tools including materials, textures, modeling furniture and project presentation. Suggestions for course assignments will be given.

#### **Advanced SketchUp (Part 3)**

This course will build upon one's current base knowledge of SketchUp to show additional techniques and short cuts.

#### **Enscape**

This introductory course will give hands-on explanation of how to create realistic renderings. Prior knowledge of Revit is necessary.

#### **Space Planning**

This introductory class will cover the basics of designing interior spaces based upon the functions required within a space and basic room layouts. Suggestions for course assignments will be given.

#### **Lighting & Electrical**

This course explains the basic symbols and strategies for designing lighting and electrical in residential design, and how these are communicated via a lighting and electrical plan. Suggestions of course assignments will be given.

#### **Hand Sketching Interiors**

This class will teach the basics of one point and two-point perspective in creating quick interior sketches.

#### **Introduction to Building Codes & Standards**

This class will introduce the building codes and accessibility standards used in the building professions. Suggestions of course assignments will be given.

#### **Wellness and Sustainability**

This class will explain how human well-being and sustainability are interconnected, the latest research on designing for well-being, and the most up to date information on sustainability. This is an introductory course, and no prior knowledge is required. Suggestions of course assignments will be given.

#### **Digital and Physical Board Construction**

This class will cover techniques and tools used in Digital and Physical Board Construction. Each student will construct a board of a given plan. Suggestions for course assignments will be given.

**Classes are only open to individuals 18 years and older. Participants do not receive college credit for these classes. Face to Face.**

For registration and questions: Dr. Diana Allison ([dallison@uiwtx.edu](mailto:dallison@uiwtx.edu)) or 210-829-3859.

**Registration closes June 14, 2024**
