Bachelor of Science in Nutrition
Nutrition & Dietetics Track

School of Mathematics, Science and Engineering

PROGRAM OVERVIEW

The Bachelor of Science (B.S.) in Nutrition in the School of Mathematics, Science and Engineering at the University of the Incarnate Word prepares graduates for success in dietetic internships and graduate nutrition programs, or as professionals in many industries that are committed to improving practices, understanding and relationships with food.

The B.S. in Nutrition is a comprehensive 122- to 126-hour program. The core Nutrition courses provide a deep understanding of food and nourishment on the human body at every stage of life, as well as the many applications of nutrition in communities and throughout the world. Nutrition students also complete 39 semester hours in supporting disciplines, including psychology, mathematics, economics and communication, in addition to the sciences. By selecting one of three tracks, students of UIW's undergraduate Nutrition program can tailor their program to support their future goals in nutrition education and the food industry; to pursue further training to become a dietetic professional or registered nutritionist dietician; or to continue their education in the health professions.

Nutrition Tracks

- Food and Nutrition Track
- Nutrition Science Track
- Nutrition & Dietetics Track

ADMISSION REQUIREMENTS

The requirements for admission to the B.S. in Nutrition program are the same as the requirements for admission to the University of the Incarnate Word.

Students must apply and be accepted into the UIW Didactic Program in Dietetics (DPD) after all prerequisite coursework is completed. Enrollment is limited in the DPD. Therefore, fulfillment of the minimum requirements does not guarantee admission to the program.
