Bachelor of Science in
Engineering - Mechatronics Track

School of Mathematics, Science and Engineering

PROGRAM OVERVIEW

The Bachelor of Science in Engineering in the School of Mathematics, Science and Engineering at the University of the Incarnate Word develops highly skilled, highly educated engineering professionals ready to succeed in the lab, in the field or in the C-suite.

The B.S. in Engineering is a 129-hour degree program that combines a strong core of math, science and engineering courses with an intensive study in one of four tracks. Students can choose from electrical, mechanical, management and mechatronics tracks based on their career or academic goals.

The Mechatronics Track is a multidisciplinary concentration that combines elements of the Electrical track and Mechanical track. Mechatronics track students can further tailor their study by selecting two courses from the Electrical track and two from the Mechanical track with the approval of their advisor.

Engineering students also have the opportunity to work with faculty on ongoing research projects, among them are Unmanned Aircraft Systems (UAS) as part of the department's Autonomous Vehicle Systems (AVS) Lab.

The Capstone course challenges students to apply their engineering education and apply it as a solution or innovation to a contemporary issue.

ADMISSION REQUIREMENTS

The requirements for admission to the B.S. in Engineering program are the same as the requirements for admission to the University of the Incarnate Word.
